Syllabus

Course: CFRS 764: Mac Forensics
Instructor: Ryan L. Chapin
Email: rchapin@gmu.edu
Class Meetings: Wednesday, 4:30 - 7:10, Robinson Hall A - Room 352
Office Hours: By appointment only

Required Materials: You will not need the following items until Week 2
500GB+ USB 3.0/FW 800 - Example
8GB+ USB Flash Drive
iCloud Account - https://www.icloud.com
MacOS X License - Link (Wait until class to download, unless you already have it)

Additional written materials will be provided by the instructor and disseminated via Blackboard

Optional:
Mac OS X, iPod, and iPhone Forensic Analysis DVD Toolkit; ISBN-10:1597492973
Mac Computer: i5 with 8GB of RAM and 500GB HDD (Lab computers will be available)

Description: Presents students with the concepts, tools, and techniques used for forensic analysis of the Macintosh based computers and iOS devices (iPhone, iPad, iPod). Students will learn digital best practices for working with Mac and iOS, be able to successfully recognize the HW and its evidentiary value, and locate/analyze artifacts of interest. Hands-on exercises will be included.

Course will consist of exercises conducted in a lab environment with concurrent lectures

Objectives: This course will present students with the basic tools and techniques used to conduct a Mac and iOS forensic analysis. Students will apply industry best practices to both the collection and subsequent analysis of Mac and iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools.

Overview Week 1 - 28 August 2013
Course Overview/Administrative Items; History
Overview of course presented, syllabus reviewed, administrative items discussed. Topic of discussion will include the history of Mac forensics.
Week 2 - 04 September 2013
Mac Analysis - Setup
Topics of discussion will include setting up and configuring a Mac to conduct forensic analysis to include file system makeup and the tools to be used.

Week 3 - 11 September 2013
Recognizing the Hardware
Topics of discussion will include recognizing the HW and understanding live & dead imaging processes (tools and techniques), automated imaging and acquisition, verifying and safely mounting forensic images as they pertain to the Mac environment.

Week 4 - 18 September 2013
Understanding Live and Dead Imaging
Topics of discussion will include recognizing the HW and understanding live & dead imaging processes (tools and techniques), automated imaging and acquisition, verifying and safely mounting forensic images as they pertain to the Mac environment.

Week 5 - 25 September 2013
Mac Incident Response & Imaging
Students will be challenged with hands-on collection and analysis of Mac data. ADD: MacQuisition!

Week 6 - 02 October 2013
Validating and Loading an Image
Students will learn how to and the necessity of properly validating of an image and the loading and parsing of an image.

Week 7 - 09 October 2013
Mid-Term Exam
Mid-Term Exam will be given.

Week 8 - 16 October 2013
Users Directory Artifacts Analysis (Part 1)
Students will learn how to identify user generated artifacts and properly identify and analyze these evidentiary items.

Week 9 - 23 October 2013
Users Directory Artifacts Analysis (Part 2)
Students will learn how to identify user generated artifacts and properly identify and analyze these evidentiary items.

Week 10 - 30 October 2013
System Artifacts Analysis
Student will learn how to properly identify and analyze system generated artifacts.
Week 11 - 06 November 2013
Application Artifacts Analysis (Part 1)
Students will learn how to identify application generated artifacts and properly identify and analyze these evidentiary items.

Week 12 - 13 November 2013
Application Artifacts Analysis (Part 2)
Students will learn how to identify application generated artifacts and properly identify and analyze these evidentiary items.

Week 13 - 20 November 2013
Unallocated Space Analysis
Students will learn how to properly identify unallocated space, analyze unallocated space, and identify artifacts of evidentiary interest.

Thanksgiving Recess - No Class - 27 November 2013

Weeks 14 - 4 December 2013
The Future of Mac Forensics
Students will look at where the Mac industry going and the forensic challenges associated with this evolution

Week 15 - 18 December 2013
Final Exam
Final Exam will be given in class.
