**Syllabus**

**Course:** CFRS 764: Mac Forensics  
**Instructor:** Ryan L. Chapin  
**Email:** rchapin@gmu.edu  
**Class Meetings:** Wednesday, 4:30 - 7:10, Robinson Hall A - Room 352  
**Office Hours:** By appointment

**Required Materials:** *(The following items are not required until Week 3)*  
250GB+ USB 3.0/FW 800 - Example  
8GB+ USB Flash Drive  
iCloud Account - https://www.icloud.com  
MacOS X License - Link (Wait until class to download, unless you already have it)

Additional written materials will be provided by the instructor and disseminated via Blackboard  

**Optional:**  
Mac OS X, iPod, and iPhone Forensic Analysis DVD Toolkit; ISBN-10:1597492973  
Mac Computer: i5 with 8GB of RAM and 500GB HDD (Lab computers will be available)

**Description:** Presents students with the concepts, tools, and techniques used for forensic analysis of the Macintosh based computers and iOS devices (iPhone, iPad, iPod). Students will learn digital best practices for working with Mac and iOS, be able to successfully recognize the HW and its evidentiary value, and locate/analyze artifacts of interest. Hands-on exercises will be included.

Course will consist of exercises conducted in a lab environment with concurrent lectures

**Objectives:** This course will present students with the basic tools and techniques used to conduct a Mac and iOS forensic analysis. Students will apply industry best practices to both the collection and subsequent analysis of Mac and iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools.

**Tentative Course Schedule:**

**Overview Week 1 - 27 August 2014**  
**Course Overview/Administrative Items; History**  
Overview of course presented, syllabus reviewed, administrative items discussed. Topic of discussion will include the history of Mac forensics.
Week 2 - 03 September 2014
Recognizing the Hardware
Topics of discussion will include recognizing the Apple HW and understanding use scenarios.

Week 3 - 10 September 2014
Mac Analysis - Setup
Topics of discussion will include recognizing hardware needs, setting up and configuring a Mac to conduct forensic analysis to include file system makeup and the tools to be used.

Week 4 - 17 September 2014
Understanding Live and Dead Imaging
Topics of discussion will include understanding live & dead imaging processes (tools and techniques), automated imaging and acquisition, verifying and safely mounting forensic images as they pertain to the Mac environment.

Week 5 - 24 September 2014
Mac and iOS Incident Response & Imaging
Students will be challenged with hands-on collection and imaging of Mac data.

Week 6 - 01 October 2014
Loading and Validating an Image
Students will learn how to and the necessity of properly validating an image and the loading and parsing of an image.

Week 7 - 08 October 2014
Mid-Term Exam
Mid-Term Exam will be administered in class.

Week 8 - 15 October 2014
Users Directory Artifacts Analysis (Part 1)
Students will learn how to identify user generated artifacts and properly identify and analyze these evidentiary items.

Week 9 - 22 October 2014
Users Directory Artifacts Analysis (Part 2)
Students will learn how to identify user generated artifacts and properly identify and analyze these evidentiary items.

Week 10 - 29 October 2014
System Artifacts Analysis
Student will learn how to properly identify and analyze system generated artifacts.

Week 11 - 05 November 2014
Application Artifacts Analysis (Part 1)
Students will learn how to identify application generated artifacts and properly identify and analyze these evidentiary items.
Week 12 - 12 November 2014
Application Artifacts Analysis (Part 2)
Students will learn how to identify application generated artifacts and properly identify and analyze these evidentiary items.

Week 13 - 19 November 2014
Unallocated Space Analysis
Students will learn how to properly identify unallocated space, analyze unallocated space, and identify artifacts of evidentiary interest.

Thanksgiving Break - 26 November 2014

Weeks 14 - 03 December 2014
The Future of Mac Forensics
Students will look at where the Mac industry is going and the forensic challenges associated with this evolution.

Week 15 - 10 December 2014
Final Exam
Final Exam will be administered in class.
