Syllabus

Course: CFRS 764: Mac Forensics
Instructor: Ryan L. Chapin
Email: rchapin@gmu.edu
Class Meetings: Tuesday, 4:30 - 7:10, Robinson Hall A - Room 352
Office Hours: By appointment

Required Materials: *(The following items are not required until Week 3)*
250GB+ USB 3.0/FW 800 - Example
8GB+ USB Flash Drive
iCloud Account - https://www.icloud.com
MacOS X License - Link (Wait until class to download, unless you already have it)

Additional written materials will be provided by the instructor and disseminated via Blackboard

Optional:
Mac OS X, iPod, and iPhone Forensic Analysis DVD Toolkit; ISBN-10:1597492973
Mac Computer: i5 with 8GB of RAM and 500GB HDD (Lab computers will be available)

Description: Presents students with the concepts, tools, and techniques used for forensic analysis of the Macintosh based computers and iOS devices (iPhone, iPad, iPod). Students will learn digital best practices for working with Mac and iOS, be able to successfully recognize the HW and its evidentiary value, and locate/analyze artifacts of interest. Hands-on exercises will be included.

Course will consist of exercises conducted in a lab environment with concurrent lectures

Objectives: This course will present students with the basic tools and techniques used to conduct a Mac and iOS forensic analysis. Students will apply industry best practices to both the collection and subsequent analysis of Mac and iOS systems with an emphasis on hands-on exercises using currently available open-source and commercial tools.

Tentative Course Schedule:

**Overview Week 1 - 01 September 2015**
Course Overview/Administrative Items; History
Overview of course presented, syllabus reviewed, administrative items discussed. Topic of discussion will include the history of Mac forensics.
Week 2 - 08 September 2015
Recognizing the Hardware
Topics of discussion will include recognizing the Apple HW and understanding use scenarios.

Week 3 - 15 September 2015
Mac Analysis - Setup
Topics of discussion will include recognizing hardware needs, setting up and configuring a Mac to conduct forensic analysis to include file system makeup and the tools to be used.

Week 4 - 22 September 2014
Understanding Live and Dead Imaging
Topics of discussion will include understanding live & dead imaging processes (tools and techniques), automated imaging and acquisition, verifying and safely mounting forensic images as they pertain to the Mac environment.

Week 5 - 29 September 2015
Mac and iOS Incident Response & Imaging
Students will be challenged with hands-on collection and imaging of Mac data.

Week 6 - 06 October 2015
Loading and Validating an Image
Students will learn how to and the necessity of properly validating an image and the loading and parsing of an image. Once the image is parsed, a “quick look” will be conducted to get first impressions of the suspect.

Columbus Day Recess - 13 October 2014

Week 7 - 20 October 2014
Mid-Term Exam
Mid-Term Exam will be administered in class.

Week 8 - 27 October 2014
Users Directory Artifacts Analysis (Part 1 & Part 2)
Students will learn how to identify user generated artifacts and properly analyze these evidentiary items.

Week 9 - 03 November 2014
System and Global Artifacts Analysis (Change for 2015 - Add Globle Pt 1 too)
Student will learn how to properly identify and analyze artifacts generated in the system and global directories.

Week 10 - 10 November 2014
Root and Hidden Directories
Students will continue to learn how to identify system and application generated artifacts and properly analyze these evidentiary items.
Week 11 - 17 November 2014
Unallocated Space Analysis
Students will learn how to properly identify unallocated space, analyze unallocated space, and identify artifacts of evidentiary interest.

Week 12 - 24 November 2014
iOS and iCloud Contributions
Students will look at an iOS backup and compare what they have previously learned with the Mac OS. Some time will also be dedicated to identifying iCloud generated artifacts and properly analyzing these evidentiary items.

Weeks 13 - 01 December 2014
The Future of Mac Forensics
Students will look at where the Mac industry is going and the forensic challenges associated with this evolution.

Week 14 - 08 December 2014
Reading Day
Preparations for the Final Exam.

Week 15 - 15 December 2014
Final Exam
Final Exam will be administered in class.
